
Technical Specifications

Every locker will be inspected for defects and brought back to proper function. "Proper Function" is defined as follow: The door opens and shuts freely without binding or sticking on either the frame or the latching mechanism. When closed the door latches on all door jamb mechanisms, with all moving parts operating freely.

- New parts used will match existing parts if still manufactured and available.
- Dents and creases which interfere with the proper function of the lockers will be repaired.
- Each bank of lockers will be checked to insure proper anchoring. Where necessary, anchoring boards and trim will be re-secured.
- Loose nuts and bolts will be tightened; missing nuts and bolts will be replaced with rivets.
- **Champion Lockers will not be responsible for the replacement of any non-working locks**, either hanging padlocks or inset combination locks, which for whatever reason inhibit the "proper function" of the lockers either before or after the repair process.
- *Replacement locks are available from Champion Lockers for an additional charge*

Refinishing of Lockers:

- Handles, number plates, locks and other parts not to be painted will be removed.
- All surfaces to be painted will be liquid sanded with a non-flammable water based metal cleaner.
- The finish will be "textured" with a minimum of three coats being applied.
- The color will be selected by the school from the color charts provided.
- Certain colors, with a clear-base, require an under coating resulting in an upcharge.
- Also available: Futurac, a sun-resistant paint for outdoor application.
- The painting and texturing will be accomplished through an electro-static application to insure proper adhesion and durability.
- **Interior of lockers will not be painted unless explicitly stated on proposal.**
- Some over spray may occur on interior surfaces when painting door jambs and door edges.
- After allowing for adequate dry time, all hardware will be re-attached and a Champion number plate installed.
- **Cleanup will be thorough.** Any overspray not contained by masking will be removed.

Guarantee: Champion Lockers, Inc. guarantees its work against defects in workmanship for one year. Guarantee covers flaking, peeling and chipping not due to normal wear and tear. All repair work will be done to the satisfaction of the school using the aforementioned specifications and will be checked and passed at job completion.
